PROFILE

Computer Engineering student driven by curiosity, problem-solving, and clean software design. I enjoy building practical solutions that connect technology with real users, combining backend logic with intuitive frontend experiences. Currently seeking a professional internship where I can contribute to impactful projects, learn from experienced engineers, and grow within a collaborative tech environment.

TECHNICAL SKILLS

• Languages: Python, JavaScript, SQL
• Frontend: React, HTML, CSS
• Backend: REST APIs, basic system architecture
• Databases: Relational databases, data modeling
• Tools & Platforms: Git, Cloud fundamentals, Excel, Power BI
• Strengths: Problem-solving, adaptability, user-focused development

SELECTED PROJECTS

Mobile Calorie Tracking App (Dart)
• Designed and developed a mobile application for calorie tracking and nutrition management.
• Focused on usability, structured data handling, and clear user flows.

Web Development Projects
• Built a car wash service website with service listings and intuitive navigation.
• Developed a platform for selling and comparing PC components, emphasizing structured data and UX.

Process Digitalization – Financial & Tax Services Company
• Supported the digital organization of internal processes across operations in three countries.
• Contributed to improved data structure and more efficient workflows.

EDUCATION

INACAP — Computer Engineering
March 2023 – December 2026 (Expected)

CERTIFICATIONS

• Certified Full Stack Developer
• Cloud Architecture Certificate
• Database Design & Management Certificate
• Basic Application Development Certificate
• Computer Support Certificate
